You're going to love me!

Profile

My day starts at 6 a.m. when I lick Mom's face. She gets up immediately (I've trained her well). Mom says exercise is important, so I make sure to take her on a nice long walk before breakfast. I enjoy saying hi to the other dogs walking their humans too. Back inside, I eat, sleep, stretch, roll over, and sleep some more until lunchtime, when a nice lady comes over and I walk her around the block. A few hours later, Mom is back home and I walk her again, and we both enjoy dinner together. I spend my evenings playing with my favorite toys—Foxy, Blue Bear, Brown Thing and Bone. I hit the pillow by 9 p.m. Mornings come early.

Experience

It wasn't always easy being me. I was separated from my family at birth and spent some time in a shelter down in Florida. A few weeks later, I moved to a new place in Wisconsin. That's where I met and rescued my Mom. Since then, Sirius, the Dog Star—we call it the Mother Ship—has reappeared in the sky three times. That means I'll be turning four years old this spring (I'm 26 in your human years).

I really love life. I have an easy smile and love to be around other people and animals. This one time, I got super excited meeting a new person that smelled really good—kind of like a BLT—and I couldn't help myself, so I jumped to tell her how much I loved her. Mom tells me not to do that and I'm getting better at keeping my "four-on-the-floor."
